

Making Learning Fun and Ecological

Lesson:

Indicators for results and outcomes

Activity: Make a difference between indicators for results and outcomes

Lead In:

Online or in a classroom (depends on the available resources)

Duration:

45-60 min

Aim:

The main purpose is for participants to understand the difference between indicators for results and those for outcomes.

Type of activity:

Activity based on real examples

Group number:

10+ participants

Teamwork

Recommended age: 18-29

Instructions:**For the educator:****Introductory part:**

The educator presents the short powerpoint presentation.

Description of the activity:

This activity is composed of 4 parts:

The trainer should give real examples of results (green and entrepreneurship oriented) and participants should give quantity and quality indicators for those results

The trainer should give real examples of outcomes (green and entrepreneurship oriented) and participants should give quantity and quality indicators for those outcomes and make clear connections as a consequence with the results from part 1.

The trainer should give 20 indicators (at least 7 quality based) and should give time in order for participants to order them right: which of them are quality and which are

quantity based, and which of them are indicators for the results, and which are indicators for the outcomes.

Joint discussion for improvement.

For the user/interested participants:

1. Read the powerpoint presentation
2. Think about difference between indicators for results and outcomes

Keywords:

indicators, results, outcomes, impact

Materials, equipment: PowerPoint presentation (only those 2 slides with the Matrix and SWOT), projector or profile at any online conferencing platform
